

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. MINER T. HINES, *Storekeeper*..... Mt. Vernon.
MRS. IDA RAYMOND, *Matron*..... Columbus.

REPORT OF THE TRUSTEES OF THE COLUMBUS STATE HOSPITAL.

NOVEMBER 21, 1906.

To the HON. ANDREW L. HARRIS, Governor:

We respectfully submit the Sixty-eighth Annual Report of the Columbus State Hospital for your consideration for the year ending the 15th day of November, A. D., 1906. In so doing we have the pleasure of stating that the year past has been one of progress; that the treatment of the patients by the authorities has been attended with success; the health of the inmates has been ordinarily good. There has been no epidemic during the year and no more than the usual number of deaths have occurred, and we feel quite confident that in all the various departments the management has been attended with good results.

We wish to express to the Governor our sincere thanks for the recent visit he made to the institution, and trust that he will find sufficient time in the future to make frequent visits and personally examine into the condition and management of the institution.

The patients suffering from tuberculosis and who have been cared for in the tents in the rear of the main building, have been greatly benefited, and have shown constant improvement in their condition, and until a separate building can be erected for the treatment of this class of patients we strongly recommend that still further provision should be made for treating all of the patients suffering from this dread disease. We hope, ultimately, the legislature will be prevailed upon to make an appropriation sufficient to erect and furnish a suitable building for the care of this class of unfortunates.

FARM.

The products of the farm and garden have been quite large during the past season, and have yielded a large amount of supplies for the support of the patients.

GREENHOUSE.

The patients have received in their several wards great benefit from the products of the same.

MOVEMENT OF POPULATION.

During the year just closed there were admitted 256 men and 196 women, a total of 452. The superintendent's report will show that during the year 1,110 men and 927 women were under treatment, showing a

total of 2,037. Discharged by the superintendent as recovered 57 men and 69 women, showing a total of 126. Discharged as improved 19 men and 14 women, showing a total of 35. Discharged as stationary and unimproved 24 men and 15 women, total 39. Percentage of deaths based on whole number under treatment, 6.94 men, 4.31 women, total 5.74.

DEATHS.

Died during the year 77 men, 40 women, reaching a total of 117. Not insane, 2 men. The number discharged were 179 men and 138 women, total 317. The percentage of recoveries, based on admissions 22.27 men and 36.2 women, total 27.9.

The number of patients actually in the hospital at the close of the year 874 men and 756 women, making a total of 1,630, being the highest population ever in the institution.

The daily average of those actually in the hospital was 854 men and 735 women, making a total of 1,589.

COST OF MAINTENANCE.

The cost per capita, for the past year, for the maintenance of those actually in the hospital was \$150.12. The current expenses for the year ending November 15th, 1906, was \$225,564.95. The salary of officers was \$9,880.63. This per capita not including carpets and furniture is \$148.01.

MEDICAL STAFF.

- During the year Dr. W. W. Richardson, senior medical officer, resigned to take effect the 15th of July. Dr. Howard Brundage was appointed by the Board of Trustees to fill the vacancy, who entered upon his duties October 15th, 1906. Dr. Richardson took a position in the Philadelphia Hospital in the insane department; after a short time he was appointed superintendent at Norristown, Pa., of the mens' wards. Dr. Richardson while in the hospital was attentive, capable and successful in his work. We wish him success in his new field.

The medical staff have accomplished much good work under the direction of the superintendent, and are to be commended for their valuable services.

Many valuable improvements have been made during the past year: among other changes natural gas has been placed under the boilers and the plant has been greatly improved by the cleaning of tubes and new ones placed where old and worn out ones were removed.

In January last they had a fire in which the carpenter shop, with all the machinery and tools were destroyed. The City Fire Department rendered efficient and valuable services in extinguishing the fire. Chief Lauer, of the Fire Department, and his men prevented any serious loss

beyond the carpenter shop and tools, and owing to their prompt action prevented what might otherwise have been a very great loss. To the Chief and his men we desire to express our gratitude for their assistance.

The Emergency Board allowed a sufficient sum to repair the building and install new machinery. We have now a very well equipped and modern shop.

SUPERINTENDENT.

On October 23d, the term of George Stockton, M. D., superintendent, expired, and he was on said date, by the unanimous vote of the Board of Trustees, re-elected to succeed himself for the period of four years, and we desire to say that during the four years of the administration of Dr. Stockton we regard it as eminently successful, giving entire satisfaction and by his fidelity to the position and eminent qualifications therefor, has shown in a high degree his fitness for and adaptation to the position..

TRUSTEES.

The term of Hon. John G. Roberts expired on the first Monday of April and he was, by the Governor, re-appointed.

REPORTS OF OFFICERS.

The report of the superintendent, Dr. George Stockton, which is herewith transmitted, is a comprehensive report of his work during the past year; we recommend it as being worthy of consideration and diligent examination to all who are interested in the care and management of the patients who have been under his charge.

The report of our efficient steward, Mr. O. L. Anderson, presents a concise statement of purchases, the variety and cost, the quantity of the same, which affords satisfactory evidence of the ample provisions made for the inmates of the hospital. We cheerfully recommend this report as showing a faithful, careful, honest administration of the institution by its financial officer.

COMPETITIVE BIDDING.

Competitive bidding has been followed for some time. We feel justified in saying that this means of purchasing the supplies for the institution has been greatly to the advantage of its management and the prices paid for articles which were submitted for competitive bidding has shown that it is the correct method to purchase supplies for the institution.

TRAINING SCHOOL.

The training school for nurses is still maintained under the supervision of Dr. Stockton, the superintendent, with excellent results and ever increasing interest to the institution.

· GROUND'S.

During the year just closed many handsome betterments have been placed upon the lawn; the drive-ways have been graded and gravel placed upon them, and the appearance of the grounds has been beautified in many respects.

The management of the institution, by our superintendent, has evidenced his devotion to the work in the improved condition of the patients and the buildings.

STEWARD.

We believe the steward has industriously and economically discharged the duties which his position demand. We commend him for his services.

Mrs. Raymond, the matron, has been faithful and careful in the discharge of the duties which her position has called her to accomplish and we commend her.

The employes of the institution, in all the various departments, who have faithfully and honestly discharged their duties are entitled to our thanks.

We submit the above as our report for the past year for the scrutiny and examination of the Governor and all concerned.

Very respectfully submitted,

H. H. GREER,
JOHN G. ROBERTS,
MARTIN B. BUSHNELL,
THOMAS B. BLACK.

REPORT OF THE SUPERINTENDENT.

To the Board of Trustees of the Columbus Hospital:

GENTLEMEN:—I respectfully submit the sixty-eighth annual report of the Columbus State Hospital for the fiscal year ending November 15, 1906.

Net current expenses for the year have been \$225,564.95. Salaries of officers, \$9,880.63. The per capita cost based on the general average of those actually in the hospital is \$148.01. The per capita, including everything except permanent improvements and new building is \$150.12.

MEDICAL ADMINISTRATION.

Movement of Population.

Admitted during the year, 256 men, 196 women; total, 452. Total number under treatment during the year, 1,110 men, 927 women; total, 2,037. Discharged as recovered, 57 men, 69 women; total, 126. Discharged as improved, 19 men, 14 women; total, 33. Discharged as stationary or unimproved, 24 men, 15 women; total, 39. Died, 77 men, 40 women; 117. Not insane, 2 men; total, 2. Number of discharges, 179 men, 138 women; total, 317. Percentage of recoveries based on admissions, men 22.27 per cent., and women 35.2 per cent.; total, 27.9 per cent.

Percentage of deaths based on whole number under treatment, men, 6.94 per cent., women, 4.31 per cent.; total, 5.74 per cent. Actual number in hospital at close of the year, 874 men, 756 women; total, 1,630. Daily average of those actually in the hospital, 854 men, 735 women; total, 1,589.

During the past year our institution has been very much overcrowded, and it has been with difficulty that we have taken care of the demands on the hospital from our district. The quotas of the different counties have not been revised for a number of years, and this should by all means be done in the near future.

The hospital has been remarkably free from sickness during the past year, for which we are truly thankful. We have had no typhoid fever since we have been using our drilled well water exclusively.

U. S. N.

MEDICAL WORK.

The following changes have occurred on the medical staff during the past year. Dr. William Richardson resigned the latter part of July to take effect August 15th, 1906. Dr. Richardson left the hospital to accept a position in the insane department of the Philadelphia Hospital. Later he was appointed as medical superintendent of the male department of the State Hospital for the Insane, Norristown, Pa. Dr. Richardson had considerable experience at this hospital, and we feel satisfied that he will do effective work in his new position.

Howard M. Brundage, an interne in this hospital, a graduate of the Ohio Medical University of the class of 1906, was appointed by the board of trustees to fill the vacancy entailed by Dr. Richardson's resignation. He entered upon the discharge of his duties October 15, 1906.

Our medical staff have been very enterprising and efficient in their work, and the results in the medical department very gratifying.

Dr. Bradley retired from the pathological department last fall to take up ward work, and since that time we have only been able to do routine work in that department. We have not been able until recently to secure the services of any one trained for pathological investigation.

Dr. Harley McDonald assisted in the routine work of the laboratory last winter, and left here in the spring after he graduated, and is now a member of the staff of the Protestant Hospital.

Dr. Samuel Orton, who has devoted several years to pathological work in Philadelphia and in other schools, was appointed at the last meeting of the board of trustees to take charge of this very important department in our hospital. We feel fortunate in securing his services, and it cannot fail to give a new impetus to this part of our work, and we believe a better result will be obtained. Leading authorities all over the world have already been urging that the wealth of material to be found in state institutions for investigation and study be utilized. We feel that a thorough and competent pathologist will stimulate the medical officers along these lines. A great deal has been done in the last decade in this direction in state hospitals, and the institutions of Ohio are taking up special lines of investigation, and we should be found at the front in this important work.

GREER COTTAGE.

This cottage was built and furnished with the plan in view to separate acute curable cases from the detrimental influences which their association with untidy, demented and otherwise annoying chronic cases might exert, and also make it possible to afford them additional advantages in treatment, diet (variety and quality), special hydrotherapeutic treatments, and more personal attention from nurses. Many cases after being transferred from other wards to the cottage, remark about the

satisfactory change, and are pleased. There are some difficulties in the matter of selecting cases to be treated at this cottage. We cannot always determine, at the time the case comes to the institution, whether or not it is curable, and as a result, cases are sometimes admitted only to be found incurable later on, and, too, it frequently happens that curable cases are retained in the wards. This condition it can readily be observed interferes materially with the recovery percentage. Should all curable cases be committed to Greer Cottage, and all incurable committed to the wards, the recovery percentage would be much larger. The records of the year just closed show a recovery percentage of 44.2 per cent. based on 52 admissions, which included five cases of paresis, and several other cases of an incurable type. Results therefore are even better than the percentage rate reveals.

HYDROTHERAPY.

Our hydrotherapy department has now been operating one year, and we take pleasure in reporting the very great value of this hydriatic treatment with method and precision. Results have been so gratifying that we now almost look upon it as being impossible to get along without this great essential in the treatment of insanity.

During the year 1,279 treatments were administered by a competent and well trained masseuse and masseur. The following is a list of the various treatments given according to prescription:

- Hot foot bath, electric light bath, salt glow, spray.
- Hot foot bath, electric light bath, Swedish shampoo, spray.
- Hot foot bath, Sitz, salt glow, spray.
- Hot and cold to spine, spray.
- Hot foot bath, salt glow, spray.
- Hot foot bath, Russian bath, Swedish shampoo, spray.
- Hot foot bath, Sitz, spray.
- Wet pack.
- Hot foot bath, electric light bath, cold mitten friction.
- Hot and cold percussion douche to legs and spine, spray.
- Chest pack, spray.
- Hot and cold spray.
- Fomentations to chest, spray.
- Hot foot bath, fomentations to spine, salt glow, spray, massage.
- Hot foot bath, fomentations to abdomen and spine, cold mitten friction, abdominal massage.
- Hot foot bath, Sitz, cold mitten friction.
- Spray, abdominal massage.
- Hot foot bath, hip and leg pack, cold mitten friction, massage.
- Hot foot bath, fomentation to abdomen and spine, cold mitten friction, abdominal massage.
- Hot foot bath, Sitz, electric light bath, Swedish shampoo, spray, massage.
- Fomentation to shoulder and arm, massage.

Moist abdominal bandage, spray, massage.

Hot foot bath, hot and cold to spine, salt glow, pail pour, massage.

Hot foot bath, fomentations to knee, electric light bath, Swedish shampoo, spray, massage.

Hot foot bath, fomentations to abdomen and spine, cold towel rub, abdominal massage.

Fomentations to feet, electric light bath, Swedish shampoo, spray, massage.

Fomentations to feet and back, electric light bath, Swedish shampoo, spray.

Hot foot bath, salt glow, pail pour, Swedish shampoo, spray.

Tepid tub bath, Swedish shampoo, spray, massage.

Hot foot bath, perineal and liver spray, Swedish shampoo, spray, massage.

Tepid tub bath, wet sheet pack, cold towel rub.

Hot foot bath, salt glow, perineal spray, Swedish shampoo, spray.

Hot foot bath, tepid tub bath, cold sheet pack, hot and cold spray to spine, centripetal powder rub.

Hot foot bath, Russian bath, salt glow, spray.

Local electric light bath to abdomen and spine, Russian bath.

Swedish shampoo, spray, talcum rub, abdominal massage.

Wet sheet pack, cold mitten friction.

Continued neutral bath, spray.

Wet sheet pack, cold hand rub.

Hot foot and leg bath, electric light bath, Swedish shampoo, spray, massage.

Hot foot bath, perineal douche, hot and cold to spine and legs, abdominal massage.

Dripping sheet rub with percussion centripetal powder rub.

We are convinced of the real virtue that lies in the use of methodical hydrotherapy, and cannot recommend it too highly as an auxiliary in the treatment of nervous and mental diseases, but were there no real virtue in the measure at all, its application would still be justifiable because of the psychical influence manifested. In the course of the year various additions have been made to the hydrotherapy rooms. A room has been furnished with table, desk, scales, etc., where complete physical examinations of all patients admitted are made. A first class electrical cabinet has been erected, a large fan run by electricity keeps the air in constant motion, and secures good ventilation.

We keep clinical notes of all patients admitted, with laboratory findings, and the nurse keeps a careful record of all salient points in the history of the case from day to day.

IMPROVEMENTS.

During the year many improvements have been made. The building was originally planned so as to afford an operating room and ward for surgical cases. This was not completed with the other parts of the building, but early this year this story was finished, and affords us a well equipped operating and sterilizing room, as well as a dormitory, and two rooms for surgical cases. This equipment has been a valuable addition to our facilities for caring for such cases as need surgical attention.

The surgical ward was opened March 21, 1906, and since that time the following cases have been operated:

Phimoses	Circumcision	Dr. Gaver
Cancer of breast.....	Amputation	Dr. Gaver
Hydrocele	Radical operation	Dr. Gaver
Cervical laceration	{Curettage, Trachelorrhaphy and	
Perineal tear	Perineorrhaphy	Dr. McKinnis
Tubercular glands of neck.....	{Removal	Dr. McKinnis
	Trepine	Dr. Gaver
Hernia	Radical operation	Dr. McKinnis
Infected glands of neck.....	Removal	Dr. Williams
Cyst	Removal	Dr. McKinnis
Lacerated cervix	{Trachelorrhaphy }	Dr. McKinnis
Perineal tear	{Periniorrhaphy }	
Perineal tear	Perineorrhaphy	Dr. McKinnis
Granulated surfaces from burns....	Skin grafting	Dr. Gaver

Other improvements have been made, such as supporting the lodge rooms with brick walls and cement plastering. This has greatly strengthened these rooms. Additional protection has been afforded the windows and porches on the first floor by steel netting and grill work. Four broom closets have been added to the two floors. On the basement floor, aside from the improvements made in the hydrotherapy department, an additional room has been completed for the storage of canned fruit and vegetables. This room is ten feet square, and cemented, and very satisfactorily fills a much felt want.

TUBERCULAR TENT COLONY.

The fourth season of the tubercular tent colony was very successful in spite of very unfavorable weather. There was an unusual amount of rain, which has an especially detrimental effect upon tubercular patients, besides interfering with their comfort and happiness very materially; it is surprising, however, how little attention the tent patients pay to inclement weather.

There was no change in the management of the colony, and the treatment was carried out along the same lines as in the previous seasons, food, rest and fresh air forming the basis of the treatment.

The camp opened April 23d, and on October 27th, on account of a very severe wind storm, which partially demolished three of the tents, the patients were removed to the main building.

There were 96 patients, 43 men and 53 women admitted to the colony during the season, 48 of them were in the first stage, 30 were in the second, and 17 in the third stage. There were eight deaths in the colony during the season. One of these cases was only in the colony 45 hours, and was moribund when received. Another was due to abscess of the lungs, and was not tubercular.

The prize case of the season was a young man 22 years old, who was admitted to the hospital April 12th, 1906. As soon as the tent colony opened he was transferred to it. He was a typical case of catatonia. He refused to talk or eat, and the muscular rigidity was marked. It was necessary to forcibly feed him for nearly three weeks after coming to the tents. There were definite signs of tuberculosis in the lungs, he carried a high temperature at times, and had a rapid irritable heart. After he commenced to improve slightly, he had a very severe attack of pneumonia. During the pneumonia, when the temperature was 104 and 105 per axilla, his mind commenced to improve, and from that time his mental recovery was rapid, and September 6th he was sent home mentally well, and in good physical condition, having gained 35½ pounds in three months and twelve days. He was in camp one month before he commenced to gain.

A woman, aged 45, also a catatonic, was greatly benefited mentally, although not cured. She had been in the hospital two years, and for over one year had been bedfast, and when admitted to the tents was in a greatly emaciated and weakened condition. It was always necessary to spoon feed her. It was not long before she was up and feeding herself, and during the season she gained 36 pounds.

A number of the cases were greatly benefited mentally. The outdoor treatment of acute mental cases certainly deserves consideration, and we would like to see a separate tent colony where suitable cases could be treated.

Miss Ella Nolan, the nurse in charge of the colony, deserves especial commendation for the faithful and efficient manner in which she discharged her duties.

TRAINING SCHOOL FOR NURSES.

It is becoming more and more evident to us as time passes that our training school for nurses is accomplishing a good work in the way of preparing the women nurses for the proper and competent discharge of their important duties.

We have had at the head of the Greer Cottage since it was first occupied one of our graduate nurses; she has entire charge of the cottage, both the domestic and detail work.

One of the nurses has also had charge of the tubercular tent colony, which has already been mentioned.

Miss Matilda Unger, a trained nurse, and highly competent, has been engaged as manager and teacher for our training school. Miss Unger is very much interested in her work, and we believe will have an unusually successful year. We have five men in the class this year.

At the commencement last spring we graduated seven nurses. The class address was delivered by Dr. E. J. Wilson, formerly a medical officer of this institution. Mr. Amor Sharp and wife, assisted by local

talent, furnished some very delightful music. Hon. H. H. Greer, president of our board of trustees, presented the diplomas.

We expect soon to begin the erection of our nurses' home. This will be the first building of the kind in the state of Ohio. The prime object of a nurses' home is to allow the nurses the privilege of sleeping away from the noise and confusion of the ward, and also give the night watches a chance to get the proper rest, which is almost impossible where they are obliged to sleep in the main hospital building. This building will also provide us extra room for patients in the various wards.

In my last report I mentioned the vast amount of repairs made necessary in a building as large as this hospital.

I cannot speak too highly of the industry and energy of the heads of the various departments during the past season. The machinist, Mr. William Davis, has almost entirely overhauled the old engines in our power plant, besides other very necessary and urgent repairs. Our steam plant has been almost entirely overhauled, gas has been installed under all of the boilers, the tubes have been bored out where they were badly stopped up with scale, and new ones supplied where the old ones were worn out. Everything is in good shape for the winter. A pump has been placed at the lake, which pumps the water from there into a large cistern near the power house, and we are using this entirely for our boilers, which will no doubt prevent the great annoyance and expense which the use of hard water has caused in the way of depositing scale in the boiler tubes, and necessitating frequent boring out of the same. The pump and cistern will also be valuable to us in case of fire.

Our power plant is taxed to its utmost capacity to light the institution, and furnish power for the motors. We need very much an extra dynamo and engine, which with the present equipment would supply all the necessities in that direction for years to come.

I desire to commend the heads of the various departments for the diligence displayed in conducting their various duties. Mr. O. L. Anderson has managed his department with his usual good judgment.

Much has been done toward beautifying and adding to the comfort of the wards by our embroidery class. The average attendance is about fourteen at each meeting, and among the articles made by the class might be mentioned about one hundred and forty table covers, about 26 dresser covers, besides many miscellaneous articles. About one hundred sofa pillows were made and distributed through the wards during the last season.

For the results of the farm and garden, we refer you to the detail report of the steward.

In concluding this report, I extend my grateful acknowledgment to you, gentlemen of the board of trustees, in again being permitted to enjoy your unvarying kindness, and the wisdom of your advice so generously given to me in our official relations.

Although entering upon my fifth year of service, I feel more and more the grave responsibility, and the necessity of your continued co-operation.

GEORGE STOCKTON, M. D.,
Superintendent.
